Technical Review 1

Overview

- > data visualization

 - calendars + time

- > data management

- > user interface design

stretch goal: dynamic web implementation

Calendar parsing

> icalendar package

> event objects

Q: other information?

> data storage

Q: pickling?

Q: privacy concerns?

Event
+ name + timezone + date/time start + date/time end + duration + location

Calendar
+ name + events + <i>parse_ical()</i>

Visualizations

> planning to us pyd3

Q: visualization libraries

> want to implement multiple view options

Q: visualization ideas?
